

“Visual Studio 2013 u4 Community Edition” Download and Installation

Downloading “VS 2013 Express for Windows Desktop” to a local desktop or laptop requires a “hard-wired ethernet connection” (not wireless!). You are welcome to use the PCs in the Computer Science labs for this purpose. The download will be a large <vs2013-express-windt>.iso file, which can be transferred to a laptop using an external USB drive.

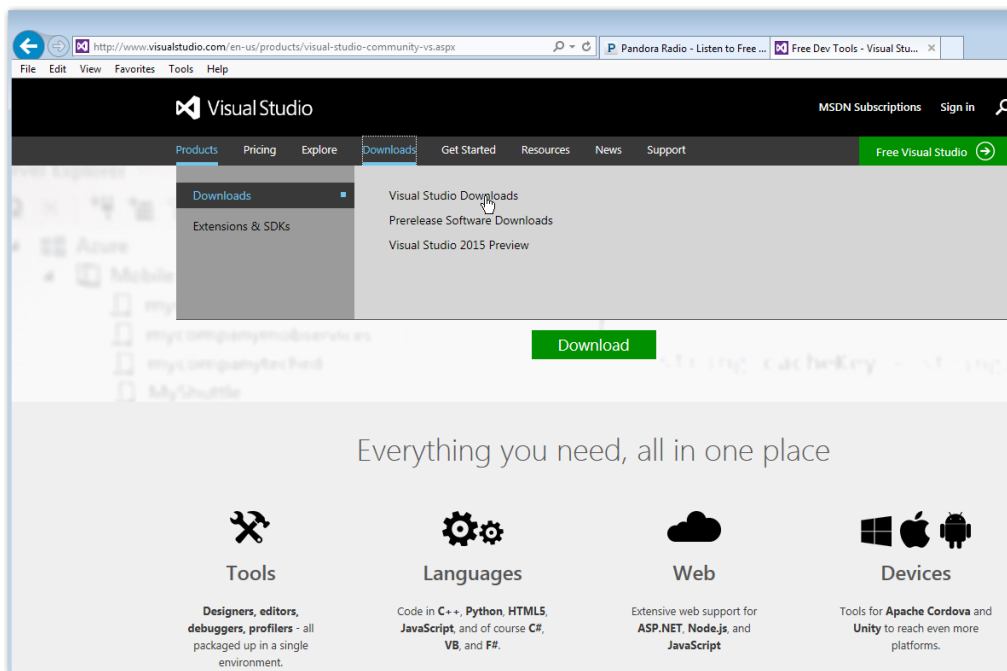

7-zip x64 software (see www.7zip.org) can be used to extract the iso file to run the install program. In Windows 8, you may be able to right-click the .iso file and mount it directly. The free tool, “Virtual CloneDrive” from Elaborate Bytes, can be used to mount and access the .iso file directly.

An internet connection will also be required during the install process, and when starting VS2013-express for the first time.

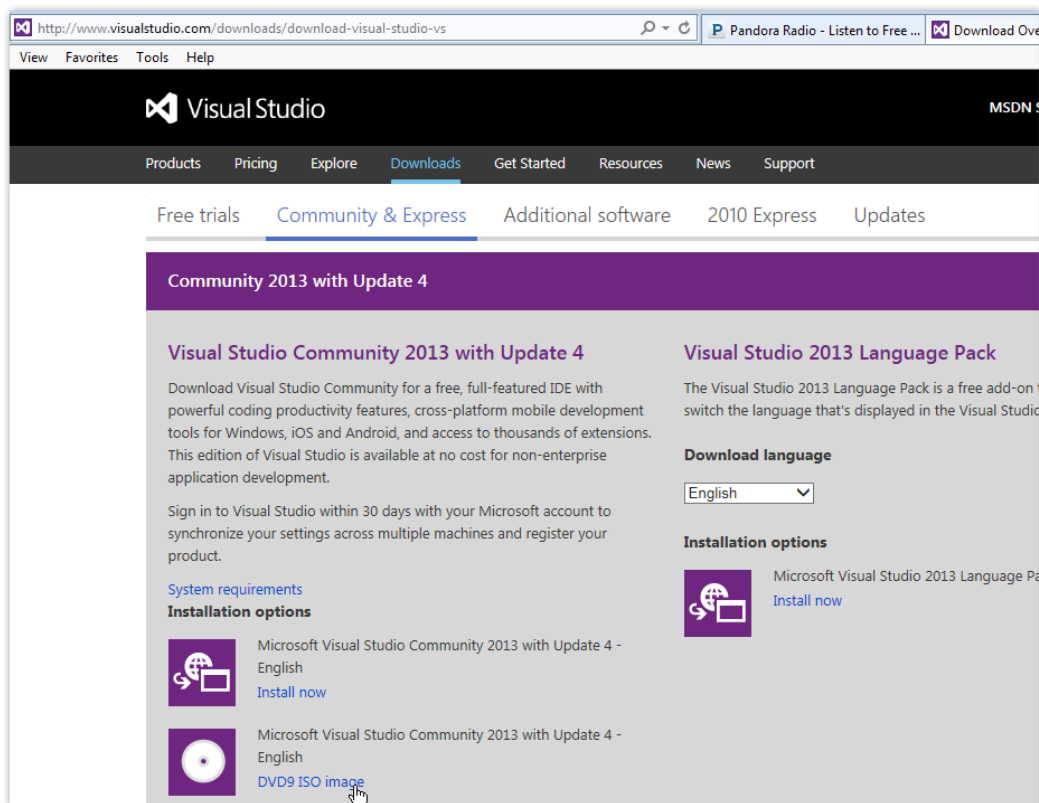

To download VS 2013 u4 Community Edition, google the following:

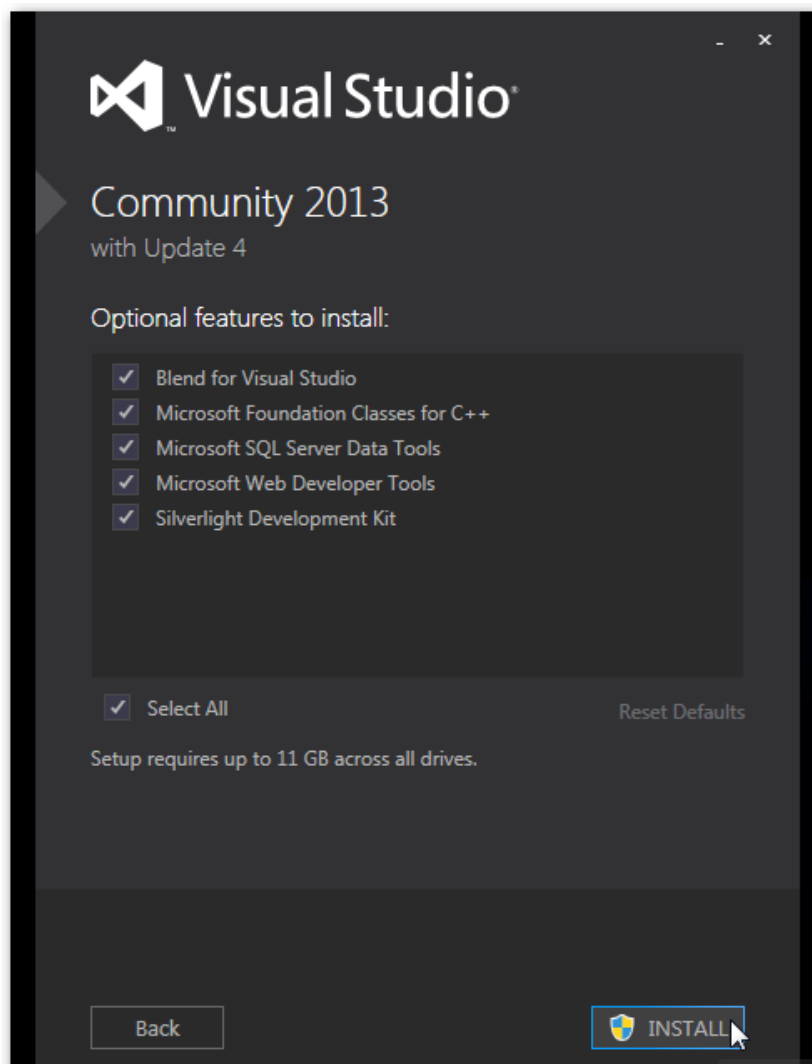

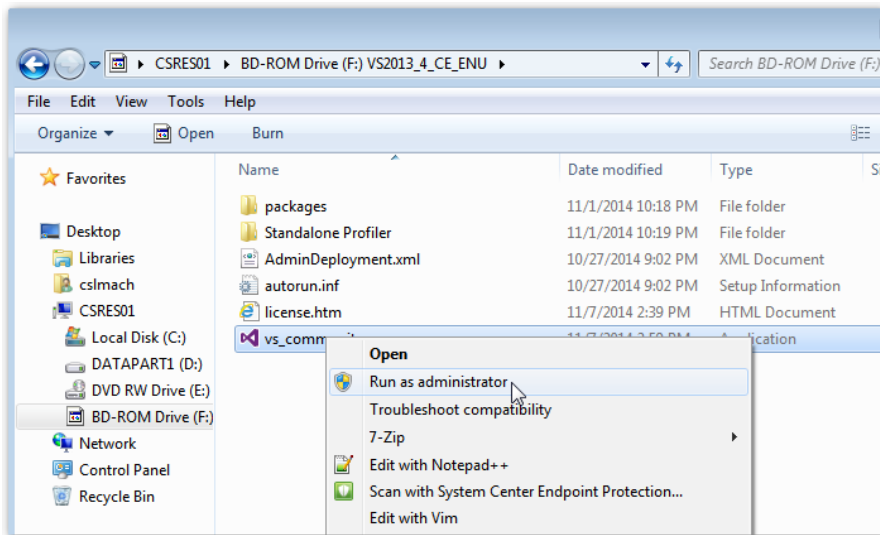

Select Downloads, Visual Studio Downloads:

Scroll down and select Community 2013 with Update 4 – DVD9 ISO image:

Use 7-zip to extract the ISO or Virtual CloneDrive to mount the ISO and start the installation:

The installation will take 20-30 minutes to complete!
